

Session 1d – Early diagnosis and intervention

Facilitator: Dr Amanda Thornton

Pre-diagnosis

Consider Lancashire wide screening process.

Key Issues

1. Training / enabling of staff, communities and users.
2. Narrowing of gap between Primary and Secondary Memory Assessment Service care, yet maintain quality and an ACCURATE diagnosis.
3. On-going support
 - Integration between physical health and mental health
 - Investment in further support e.g. cafes, dementia advisors.

All the above to be client led.
